Re: Public Hearing #P20-38S
Slate Upper School

Dear Commissioners,

I would like to correct an error that I made in my comments at the June 15, 2021, public hearing for this proposal.

I was discussing the applicant's simulation of traffic flow at the site driveway. I stated that it did not reflect the queue lengths that were noted in their Table 3 (Capacity and Storage Queue Analysis Results), which I said were approximately 8 to 10 cars waiting to turn out of the driveway, and 3 to 5 cars waiting to turn in.

The queue lengths noted in Table 3 are in feet, not car lengths. Therefore, the simulation is consistent with the information that the applicant provided in Table 3. I apologize for the error and any confusion that I may have caused.

I look forward to answering any questions you may have about my analysis at future hearings.

Sincerely,

Daniel W. O'Neill, P.E.
