Re: # P21-08 Site Plan 80 Old Broadway & P21-081S

Dear Alan;

I am requesting a minor modification to the permits shown above to provide a simpler parking lot layout that utilizes the existing drainage pattern that is presently being utilized on the property. There is presently a catch basin in the NE corner of the property that allows for the slow filtering of the storm water runoff to leave the property. This will continue after the parking lot is modified. The plan maintains the same number of parking spaces and slightly reduces the amount of impervious pavement. This will also allow for better snow removal from the parking area.

CC Denice Reynolds

Best Regards,

George Cotter PE
