PLANNING AND ZONING COMMENTS for 6 DECEMBER 2021

#P21-26 &
#P21-26A

400 SACKETT POINT ROAD
(MAP 35, LOT 9)

IG-80

METTLER REALTY, LLC, APPLICANT & OWNER
SITE PLAN & CAM APPLICATIONS

Review Comments:

1. These applications are being made in an effort to satisfy the condition of approval imposed by the Commission on 5 June 2017 in approving the Niklyn Corp.'s change of use for a metal fabricating and finishing use. The condition required receipt and approval of Site Plan and CAM applications within 90 days.

Principally, the applicant is seeking approval for outdoor storage in accordance with Section 10.1.3.25. Additionally, approval of an area in the southeast corner of the property for outdoor storage of trucks and trailers is being sought. No landscaping or fencing improvements are proposed. All of the uses require approval except Sunrunner Trucking which was previously approved.

A similar set of applications (#P18-07 & #P18-07A) were made and then withdrawn on 3 August 2018 because revised drawings were not produced in a timely enough manner.

Another similar set of applications (#P19-01 & #P19-01A) were made and then withdrawn on 1 May 2019 because drawing revisions were again not completed in a timely manner.

Another set of applications (#P19-28 & #P19-28A) were made and subsequently denied on 2 December 2019 because they did not address all of the violations on the property.

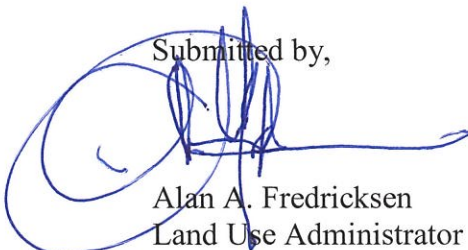

2. Verification of the historic acceptance that there are no Inland Wetlands soils on the property needs to be provided. **Verification has now been provided.**
3. A review of the site revealed inoperable trucks, trailers and other equipment. These items need to be removed from the property and disposed of properly in accordance with all applicable regulations, rules and laws. Any approval granted should be made contingent on this.

4. The Commission needs to determine what, if any, fences/barriers will be required to delineate and otherwise contain the various proposed outdoor storage areas and what screening might be required. Outdoor storage still exists in areas where it is not proposed. It should be removed from these areas prior to any approval taking effect. **The drawings have been revised to better articulate the contents and extents of the proposed outdoor storage areas.**
5. The Commission needs to determine if any improvements to the property will be required relative to pavement, drainage or landscaping. The condition of the parking areas is poor.
6. The Commission needs to determine if the requested waiver of required street sidewalks will be granted.

Recommended Conditions of Approval, if granted:

1. Submit revised drawings which include:
 - a. A note indicating “#P21-26, Site Plan Approval and #P21-26A, CAM”.
 - b. Clear delineation of areas to be used for outdoor storage and what will be stored.
 - c. A note indicating that all inoperable trucks, trailers, other equipment and debris will be removed from the property and properly disposed of in accordance with all applicable laws and regulations.
 - d. Any fences/barriers or screening required by the Commission.
 - e. Screened, gated dumpster pads and enclosures.
2. Soil and erosion controls must be inspected by the Zoning Enforcement Officer before work may commence.
3. The property owner, and/or his/her agents, must maintain (repair/replace) when necessary, the siltation control until all development activity is completed and all disturbed areas are permanently stabilized.
4. Any proposed signage or fencing will require the filing of applications with the Zoning Enforcement Officer.
5. Submit an as-built plan prior to bond release.
6. Post bond, as required.
